LIFE AND CAREER
MANAGEMENT SKILLS FOR STUDENTS

OUTLINE FOR PARENTS

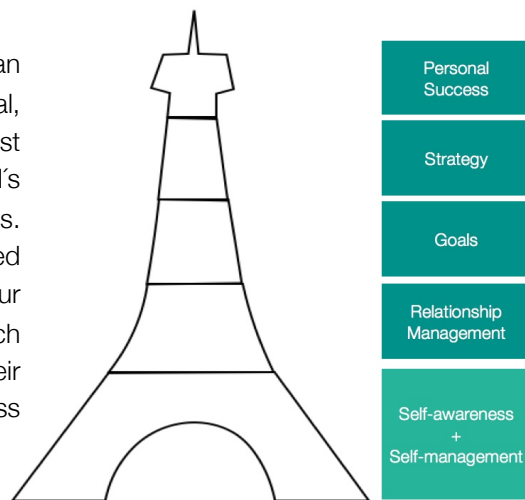

BACKGROUND LMS

In the last few decades the business world has become more dynamic and uncertain and our lives more open and filled with new opportunities than ever. But how can we make good decisions for our life and career in these challenging times? With over 10 years of experience as a coach in business and education I have created a cutting-edge curriculum for schools addressing these issues to help students develop an excellent life and career management. This starts right at the core of their own personalities, because you need to know what is leading your decisions and how to manage yourself, so that you can manage relationships or lead people. **We want to prepare the leaders and team players of tomorrow for their future career!**

HOW WE HELP TO THRIVE

Discovering one's personality and career management skills is an exciting journey! We provide a modular program with a lot of practical, hands-on experiences (indoor and outdoor): Learning by doing, not just by studying! The program can be flexibly fitted into the school's schedule. The topics build on each other to ensure a directed process. We use professional training and coaching tools which are well-adjusted and proven effective to students and the educational environment. Your kids will work out a clear guideline for their life and career design which will be documented in their workbook - for later job interviews and their own personal guidance. We see the personality development process like the building of a tower:

For your personal success you have to start at the foundation!

WHAT MAKES US UNIQUE

We connect the passion and potential of your kids with their academic knowledge by starting at the roots - their own motivation! How do they see themselves? We walk them through the process of becoming aware of their uniqueness and personality so they want to discover their own potential! We are the only company offering not only a self-study guide, but also providing a professional coach for your kids to help them make their own dreams a reality. Skills are action-related, that's why they must also be learned through activities and intentional conversations. This is only possible through professional guidance! After the LMS program your son/daughter will have a „bigger picture“ of his/her own self- and career management, and will know how to approach the next steps. **In this way they establish relevant future skills which set them apart from others, giving them a vital advantage in their dream career!**

Your Kid's benefit

- Program led by a professional, not a self-study guide
- Modular program provides real lasting results
- Fun and effective tools to practice social skills
- Advantage in future careers through relevant skills
- An increase of learning motivation through enhanced personality skills

Sincerely,

Tim Seefeld
Director and Founder of LMS
Certified Coach
